### Summary

Full Stack Software Developer with over 5 years of business experience focused on improving operational effectiveness. Experience in Javascript, React, Node, and Express to build fully functional web applications. Strong communicator with a proven record in bridging the gap between technical teams and their stakeholders.

### Projects

#### Pizza Party (<https://pizzaparty.netlify.com>)

##### Frontend Developer | React, Context API, CSS Grid, Flexbox, and Styled Components

An interactive adventure game that allows players to control their turtle adventurer to navigate sewer passages in search of pizza.

- Collaborated with 1 Frontend Developer and 2 Backend Developers for this 4 day build
- Managed global game state using Context API and hooks for seamless game interactions
- Designed and built intuitive interface for users, including rendered map visualization from backend data

#### Wanderlust (<https://github.com/Wanderlust-build-week-project/back-end>)

##### Backend Architect | Node.js, Express, Knex, SQLite3 /Postgres

A website that showcases a variety of tours in various locations. Connects both customers and tour guides for streamlined search and sign up.

- Worked alongside 1 other Backend Developer for database schema design and creation
- Built a Postgres database and wrote API endpoints within 2 days for quick deliverable to the frontend team
- Applied JSON web token technology to develop user credential authentication

#### Lambda Lifts (<https://lambdalifts.netlify.com>)

##### Frontend Developer | React, Redux, Sass

A weight lifting application that enables users to create custom work outs with a variety of exercises.

- Contributed to a cross-functional team of 5 developers on a 4 day project
- Designed and managed global state using Redux
- Collaborated closely with UX Designer and Jr. developers on meeting various design criteria to build a beautiful interface

### Employment

#### Lambda School
